## How to Write a Resume: Let's Go Back to Basics

**If your career is a journey, your resume is your passport!**

Okay, we just said that out loud and realised how cheesy it sounds – that's on us! But, it is *kind* of true – a well-written resume is your starting point, and it will grow with you alongside your career.

Everyone has different ideas for what makes a 'great' resume, but there are some obvious ideas for what makes a 'bad' resume – knowing the difference can be confusing!

We're going right back to basics with this blog because we know that's the best place to start sometimes. We've scoured the internet, picked the brains of our [employer friends](#), and collated the best advice we could find.

## When is ADFA Open Day?

**21 August 2021**

This is a chance for potential ADFA candidates, Defence families and members of the community to learn more about the lifestyle, military training and tertiary education on offer at the Academy. There is also a range of military displays by the Navy, Army and Air Force to give you a snapshot of some of the careers available to you in the ADF. Thousands of people attended the 2019 ADFA Open Day and enjoyed the RAAF solo Roulette display, Police military working dogs display, and a simulated ground based infantry attack by ADFA Midshipmen and Officer Cadets. Army vehicle displays, Army Parachute Display Team, Navy helicopters and much more. ADFA's Midshipmen and Officer Cadets ran stalls, selling food and interacted with families and potential candidates to provide them with insight into life at ADFA.

Further details about the 2021 ADFA Open Day, including any restrictions on attendance due to the ongoing COVID-19 pandemic, will be advised as they become known.

## ANU How to Apply Direct 2022 - Consider which ANU programs are best for you

Opens 3 March 2021

Closes 24 May 2021

Here are the first couple of steps to follow. The remainder are to be found using the link below:

**Step 1** - Check you're eligible to submit a direct application to ANU

You are eligible if:

- You completed Australian Year 11 or International Baccalaureate Year 11 and will complete your Australian Year 12 studies in 2021 or an International Baccalaureate Diploma in November 2021.
- You will be applying for an undergraduate program that starts in 2022.
- You are a domestic student, this includes:

- Australian citizens;
- New Zealand citizens;
- Holders of an Australian permanent humanitarian visa; and
- Permanent residents of Australia.

**Step 2** - Consider which ANU programs are best for you

View [Programs and Courses](#) to find a program that best suits your interests.

You can also view admission requirements including minimum selection rank, prerequisites, study options, and any additional entry requirements that are required as part of your application.

**Step 3** - Check that you meet the co-curricular or service requirement

The co-curricular or service requirement considers the knowledge you have developed outside of the classroom and recognises this in your ANU application.

You'll need to provide documentation to support your activities over the last two years, such as school reports or certificates for community activities. You can view [examples of documentation](#) we accept, or use our [supporting documentation template](#) to help.

Find out if you meet the requirements by using our [co-curricular or service calculator](#).

### **ANU - What will engineering look like in 2050?**

16 March 2021. 5pm

Much has changed in the field of engineering and the wider world over 30 years. The world in which we live is changing at an increasingly rapid pace, and technology and innovation continue to play an ever-increasing role in our day-to-day lives. Engineers have been at the forefront of this change and played vital roles in finding solutions for the issues of our time - whether that be in automation, climate change, or dealing with pandemics. Looking forward another 30 years to 2050, how will the world and engineering have changed?

And what will engineering look like then?

Join us and our panel of experts for a discussion on the changing face of engineering as we look at trends for the future. We will also be holding a sneak preview into our newly renovated Birch Building, part of the new School of Engineering.

### **Simulated UCAT Day Workshop: 2-Day program**

If you are in Yrs. 10, 11, 12, or perhaps you may be older and considering sitting the UCAT in the future, then this program is for you. The Simulated UCAT Workshop program is ideal and often a necessary step towards effective and efficient preparation for the UCAT.

This event will be conducted by the **National Institute of Education** in partnership in partnership with **UCAT Preparation Australia, MICAS** (Medical Interviews and Career Advice Services) and **PTTI** (Pro Training Tutorial Institute).

The workshop is primarily designed to cover fundamental techniques in navigating all five sections of the UCAT test and also for participants to gain a better understanding of their own level of preparedness for the test. Over the course of the years, the program has evolved into more comprehensive and holistic exercise, which not only achieves its primary goal, but it is also exposing students to a wealth of knowledge about all other aspects of the journey into a medical degree. The latest update has seen the program grow into a 2-Day event as the sheer amount of content covered was too great to fit into a 1-day program.

### **CSIRO Virtual work experience program**

Are you the parent of a Year 10 or 11 high school student? Your child can gain first-hand experience of CSIRO's research in science or engineering by participating in our 2020 Virtual Work Experience Program. The virtual work experience program supports students to undertake work experience despite COVID-19 interruptions and provides access to work experience opportunities for students who may face geographic or other barriers to participating in traditional work experience. It also allows students the opportunity to experience contemporary ways of working, from homes, and with people across geographic boundaries, just as CSIRO scientists do every day. Virtual work experience allows students to undertake collaborative, group science, technology, engineering and maths (STEM) projects, including projects linked to real-world CSIRO research and industry challenges. Instead of students attending a CSIRO site, experienced CSIRO staff or STEM industry professionals will supervise groups of students remotely using a secure online platform. The groups will comprise up to five students who may be remote from each other and who will work together to complete work and tasks that can be used as part of portfolios and help inform their study and/or career plans.
